From: Brussels

16 years of experience
Married, 3 children
Born in March 1978

RESUME

Tawfik awarded a diploma in computing of management. He began his career as developer JAVA on a project J2ME, for which he was responsible for the complete analysis and for the development. Afterwards, he began a specialization in the JAVA technology, with a particular interest for the architecture J2EE. He strengthened his experience in J2EE on several projects. Tawfik is always interested to explore new center of competences and work on new functional areas.

CERTIFICATION

July 2013
- JAVA 6 programmer @Oracle

May 2013
- HTML, CSS3, JavaScript @Microsoft

November 2012
- Scrum Master @Agilebee

TRAINING

March 2015
- Site Factory: HTML5, Jquery, Backbone

August 2011
- Branch Transformation Toolkit (BTT)

June 2009
- Rational Business Developer: Enterprise Generation Language (EGL)

May 2009
- Entreprise Java Beans 3.0

June 2008
- Spring and JSF

April 2006
- Extensive training in Java: Specialization Java oriented in the technologies XML.

Langages

Notion : C++, Delphi, Objectif C, Android Java, SQL

Confirmed : Java, UML, EGL

IDE

Notion : C++, Delphi, Objectif C, Android Java, SQL

Confirmed : WebSphere, RAD/RBD, Eclipse (RPC), IntelliJ

Web

Notion: CSS, Javascript, php, Bootstrap, Angular

Confirmed: Html

DataBase

Notion: SQL Server, Oracle

Confirmed: Hibernate, MySQL

Framework

Notion: Spring WebFlow, HttpUnit.

Confirmed: Spring (core, MVC, AOP, Security, Boot), JSF, JSP, Maven, BTT, Junit, SAML, Swagger.

Versioning

Notion: Dimensions, Harvest, ClearCase

Confirmed: SVN, CVS, GIT

Distribution

Notion:

Confirmed: Webservice, Rest

Tools

Notion: Fortify

Confirmed: Jenkins, Artifactory, Azure Devops

EXPERIENCE

Developer Java.   Since 07/2021

@Alphacredit

- <u>Tribe AD</u>**:** Pool of java developer, manage and maintance all application of Alphacredit,

- <u>Tribe Wheels</u>**:** The objective was to creation of several API in springBoot for the Alphacredit Business. Communication btw several API.

Technical Environment

Java 8,11, IntelliJ, Spring Boot, Spring Security, SALM2, Swagger, Maven, Jenkins, sonar, Artifactory, Git, SQL (Server Management Studio), Oracle, MobaXTerm, WinSCP, Putty, WebSphere, Hibernate, Miro, Jira.

Developer Java, Technical analyst and tester   01/2017-06/2021

@ING

- <u>Lease</u>**:** In team of 4 peoples, the objective was to maintance the main application ING LEASE

- <u>CARDS</u>**:** Single developer in a team composed of several people in various separate teams, I take care of the development of the projects and the deployment of these using Azure Devops. My tasks are: Develop in java new APIs, setting up servers. Creation Rest APIs Java using Merak and Ansible script to deploy automatically on Linux server (cloud).

- <u>S.TAR</u>**:** In team of 9 peoples, the objective was to maintance the main application Billing TAR,

  Analyze and development of several projects. Export project from Dimensions to GIT

  My tasks are: Write story (technical analysis), develop in java new changes of the project, configure the catalogues of the project and some test in acceptance

- <u>NCA</u>**:** In team of 4 peoples, the objective was to maintance the main application CSI

  Technical Environment

  Java 8, Eclipse, Maven, Jenkins, Artifactory, Ansible, Azure Devops, Dimensions, Git, SQL (IBM System I Navigator), Oracle, MobaXTerm, WinSCP, Putty, Messaging Q services, WebSphere, Hibernate, Polymer, Angular, Kafka, Message SAGE, SNOW.

Developer Java.   05/2016-01/2017

@M-Team

- <u>JADE2</u>: In team of many peoples, the objective was to maintance the main application JADE2(Eclipse application), participation on under application *Indemnity*.

  Technical Environment

  Java 6, Spring, Hibernate, Eclipse RPC, Jetty server, Maven, CVS,

  Jira, SQL (IBM System i Navigator).

Developer Java / Integrator   08/2014-05/2016

@BNP Paribas Fortis

- PCBanking: In team of many peoples, the objective was to maintance the main application PC Banking, participation on divers' projects for the platform PCB, PCBB, EBW

  Technical Environment

  Java 7, BTT, Eclipse, XML, SAOPUI, IBM WebSphere (RAD), maven, SVN.

Developer Java   07/2014

@ING

- In team of 2 peoples, the main objective was to create web services and WSDL file from a XSD documents to make major changes to the data bank customers

  Technical Environment

  Java 7, Eclipse, WAS 8.5, MVC, EJB3.0, EJB3.0, Open JPA, XML (WSDL, XSD) Webservices, SAOPUI, IBM WebSphere server MQ, JMS, DB Oracle, Maven.

Developer Java.   09/2013-06/2014

@SPW

- EDS: In team of 15 people, the main objective is to create a set of applications related for the service public Wallonie. The applications for declarations of area on the web have interactions between diver projects. The applications EDS operate in a highly distributed system with data replication environment. These applications will be used by the farmers themselves to declare their territorial possessions to get aid from the Wallon government.

  Technical Environment

  Java 7, maven, SVN, JBoss, Vaadin, Eclipse, SCRUM, Web services, SAOPUI, Liferay, portlet.

Developer Mobile.   01/2013-09/2013

@BUSI

- Self-training for BuSI, Create some mobile applications for IOS (Objective-C) and Android. Preparation of the different certifications.

  Technical Environment

  Java for Android Eclipse, Objective-C under mac and xCode.

Developer Java.   08/2011-01/2013

@ING

- CRS Express: In team of 8 peoples, the main objective was to create web services to make major changes to the data bank customers.

- Home Bank: In a team of 13 peoples, the main objective is to create maintain a banking application for managing account of mandators

  Technical Environment

Java 5, Eclipse, RAD8, MVC, EJB2.1, EJB3.0, JPA, Spring, XML (WSDL, XSD) Webservices, SAOPUI, IBM WebSphere server MQ, JMS, DB Oracle, Junit, ANT, Dimension (versioning), JSP, BTT, Fortify, Scrum.

Developer Java.   04/2011-08/2011

@Euler Hermes

- Development of a web application for classifying insurance policies in a hierarchy tree.

  Technical Environment

  Java, Eclipse, Tomcat, JSF, Spring, Hibernate JPA, MVC, DB2.

Developer EGL, Functional analyste.   06/2009-04/2011

@ETNIC

- Cioc: In teams of two people, the goal is the development of a management system designed to serve the youth assistance of the Ministry of Education.

- SIEL: A team of 4 people, the objective is to develop a system to manage the enrollment of students in a school.
